New Construction Surges at CCPS

Nearly four months after the official groundbreaking, East Clayton Elementary is moving forward quite rapidly. Construction of the new over 120,000 square foot facility includes eight phases. Productively the building pad has been graded and footings have been poured for all phases. Along with this, Perkins+Will's beautiful design is already peaking through with the erection of steel taking place of the K-2nd corridor and administrative area which includes both the cafeteria and gym. The stormwater detention pond is complete and storm and sewer installation are ongoing. The new East Clayton Elementary is scheduled for occupancy in the Summer of 2018.

Riverdale High Gym

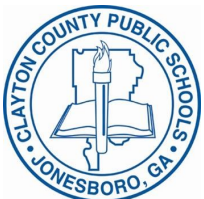

Riverdale High School's new Competition Gym continues to make forward progress. Steel erection has started and is complete with block and brick installation ongoing. Concur-

rently, installation of the sprinkler system, plumbing and electrical is ongoing. On the exterior, the new courtyard is near completion and roofing installation has begun with the insulation as well as the ice and water shield complete. The new Riverdale High Competition Gym and

Existing Gym Modifications project is scheduled for completion for the Fall of 2017.

Elite Scholars Academy

Great progress continues at the new Elite Scholars Academy. With the completion of brick, roofing and window installation things are truly shaping up for the new facility. Interior finishes have now begun in the middle school, administrative and commons areas. Painting is near completion, kitchen equipment is complete and floor installation has begun. Outside of the facility, grading and the curb for the 400m track has begun and the concession stand is near completion. The new Elite Scholars is scheduled for occupancy in the Winter of 2018.

Morrow & Edmonds Elementary

With the completion of the new K-2nd and 3rd-5th grade playgrounds, the Morrow and Edmonds Elementary project is now complete. In addition to the playgrounds, the project included painting and new flooring of the entire interior of the school, restroom upgrades, new intercom systems and security upgrades. The \$8 million Morrow and Edmonds Elementary Renovations project was designed by Stevens & Wilkinson and performed by Meja Construction, Inc.

Upcoming Projects

CCPS' Construction Department is also still at work designing and revving up new projects. Recently, the Lee Street Elementary Renovation project, designed by BRPH Architects-Engineers, Inc. was awarded to Nix-Fowler Constructors, Inc. for \$3.3 million. The project is scheduled to begin this season. Also, still under design is the Arnold Elementary School Renovation project. The project is scheduled for bid and start of construction later this year.
